

# Where It Ends (Helios Remix)

## Boy In Static

You've come around, you've come for more  
I don't believe we've met before  
Forget the day we saw the end  
Just come and fall in love again Here's where it starts  
The same place, the same breaking hearts  
And where it ends  
We'll meet here and fall apart again I'll stay a while to watch you sleep  
The sun is fading and so are we  
I'll stay a while to watch it end  
Then break your heart to know I can The first time that I learned I could make you cry  
Was just like how I thought you looked inside  
The last time will be one night of whispered lies  
The last time that I'll pretend you could be mine
