

Words to Look After

Konu

Words to look after from this first chapter

As if I have to tell them my reality

Cause them pas know, what the befores know

Iâ€™m â€˜bout to touch your mind

Iâ€™m from the land of palm trees and gun smoke

187 he wrote and many men choke

Off greenery to slow down the scenery

Good evening my people, mya thunder got no equal

This manuscript I spits with Cali culture

Delivered with my riffs from native sources

I hear them voices, câ€™est dem mya come fou

But itâ€™s I that they a call upon to push this vibration true saying

Words to look after from this first chapter

As if I have to tell them my reality

Cause them pas know, what the befores know

Iâ€™m â€˜bout to touch your mind

Words to look after from this first chapter

As if I have to tell them my reality

Cause them na know, what the befores know

Iâ€™m â€˜bout to touch your mind

I scan them books for clues on where we come from

And the truth of it all but sometimes it makes my head numb

Cause some things donâ€™t fall in place, and some things have been erased

So I got to make conclusions on what befores tell me

My scattered thoughts to lead to clearer pictures

As you can tell from this chant of rambling figures

And some day you just might get it, and if that day comes

We can post up have some brews and conversation

Words to look after from this first chapter

As if I have to tell them my reality

Cause them pas know, what the befores know

Iâ€™m â€˜bout to touch your mind

Words to look after from this first chapter

As if I have to tell them my reality

Cause them na know, what the befores know

I'm about to touch your mind

I'm from the land of palm trees and gun smoke

187 he wrote and many men choke

Off greenery to slow down the scenery

Good evening my people, mya thunder got no equal

This manuscript I spits with Cali culture

Delivered with my riffs from native sources

I hear them voices, c'est dem mya come fou

But it's I that they a call upon to push this vibration true saying
