

Nobody's Real

Powerman 5000

Scary monsters
And super peeps
The more you dream
The less you sleep
Life as you know it
Has gone away
Unbound, unwound
Who's here to stay, alright!

Nobody's real but they're willing to let you know
Nobody's real but they'll feel it tonight
Nobody's real but they're willing to let you go
Nobody's real but they'll feel it...

Could you predict
Could you foresee
Artificial by necessity
Rockets and robots
Can save your life
When you don't care about
What's real it's alright, alright!

Nobody's real but they're willing to let you know
Nobody's real but they'll feel it tonight
Nobody's real but they're willing to let you go
Nobody's real but they'll feel it....

How do you sleep
With the time that's left you
It's all been done
There's no need for the rescue
So let's just get out
I swear there's no doubt
You can't be ready
Cause there's nothing left to do, okay!

Nobody's real but they're willing to let you know
Nobody's real but they'll feel it tonight
Nobody's real bu they're willing to let you go
Nobody's real but they'll feel it...

(x2)

Nobody's real...

Nobody's real...
