

# Digital Life

## Empire of the Sun

I'm standing in her room now  
She's saying that I've been gone too long  
She says she's witnessed hundreds of hours  
People they all just wander around I'll get higher tonight when I know that you're here  
Feel the digital life keeping me young  
This digital life don't keep me warm  
Give me iron for bones so I could be strong The time is ticking down to zero  
She's praying that it won't run out  
She says we've lost our sense of nature  
People they all just wander around I get higher to life when I know that you're here  
Feel the digital life keeping me young  
This digital life don't keep me warm  
Give me iron for bones so I could be strong Part of one family  
It's never just you and me  
Part of one family  
Part of one family  
It's never just you and me  
Part of one family I get higher to life when I know that you're here  
Feel the digital life keeping me young  
This digital life don't keep me warm  
Give me iron for bones so I could be strong
