

# Get Up Get Down

Phillip Phillips

Get up, get down, get a little bit closer to the scene  
Find out what's there, something new to conceive  
Get up, get down, get a little bit closer to me  
Find out what's there what you can be  
Yesterday was our time to turn back again  
And instead we went through the fire to get lost in sin  
Burn, baby, burn let me cool you down again  
Turn, baby, turn to see where it all begins  
'Cause it's alright, it's out there  
Go and get lost, girl  
It's alright, I'm out there  
Let me take control

Get up, get down, move a little bit closer to the scene  
Find out what's there, something new to conceive  
Get up, get down, get a little bit closer to me, girl  
Find out what's there what you can be  
Walk it off but keep it on  
Let it take control of every cell inside your body,  
Each and every bone  
Burn, baby, burn -- let's cool it down again  
Turn, baby, turn to see where it all begins  
Yeah, it's alright, it's out there  
Go and get lost, girl  
It's alright, I'm out there  
Let me take control

Get up, get down, move a little bit closer to the scene  
Find out what's there, something new to conceive  
Get up, get down, get a little bit closer to me, girl  
Find out what's there what you can be  
Na na na na na no  
Na na na na na no  
Na na na na na no  
Get up, get down, just a little bit  
Get up, get down, just a little bit  
Get up, get down, let's get lost in this merry-go-round and round  
Na na na na na no  
Na na na na na no  
Na na na na na no

Get up, get down, just a little bit  
Get up, get down, just a little bit  
Get up, get down, find out what's there, find out, baby, it's you and me  
Get up, get down, move a little bit closer to the scene  
Find out what's there, something new to conceive  
Get up, get down, get a little bit closer to me, girl  
Find out what's there what you can be  
Get up, get down, move a little bit closer to the scene  
Find out what's there, something new to conceive  
Get up, get down, get a little bit closer to me, girl  
Find out what's there what you can be
