

# Dancing On My Own (feat. G-Dragon and TOP)

Pixie Lott

(You know I'm trying to make it happen for us right now  
I gotta do what I gotta do, for me and you) I remember we were living like kings and queens  
In a little tiny castle made of hopes and dreams  
It was destiny, meant to be, so complete, the perfect team  
Suddenly there's a glitch in the system  
And between us is a big strip of distance  
They say it's supposed to make the heart grow fonder  
From all I can tell it couldn't be wronger A little bit more goes a long way  
A little bit of right goes the wrong way  
I keep giving you keep taking  
Trying to make a living be patience I just don't know where to go  
So I'm dancing on my own  
I've been waiting way too long  
Dancing on my own  
Play one more song, song, song  
But you're not coming  
Song, song, song  
But you're not coming home I don't want you dancing by yourself  
And I don't want you picturing yourself with someone else  
I know I made some promises and honestly I wanted this to work out  
I didn't know the shiny star I found was about to burn out  
So what now, we go around like a record  
I'm feeling disconnected and you're feeling disrespected  
I don't know how this going back but 'til I'm home you should turn that track on And that's all I get from you  
But I give my all to you  
And that's all I hear from you I just don't know where to go  
So I'm dancing on my own  
I've been waiting way too long  
Dancing on my own  
Play one more song, song, song  
But you're not coming  
Song, song, song  
But you're not coming home I always think about her  
Try to not over think about her  
I always dream about her  
Try not to dream about her  
I'm feeling so lost without her  
I, I, I, I try to come home  
And it's so hard being out on my own

It breaks my heart to leave you aloneI just don't know where to go

So I'm dancing on my own

I've been waiting way too long

Dancing on my own

Play one more song, song, song

But you're not coming

Song, song, song

But you're not coming home
