

# Into the Moonbeam

## The Horrorist

Up in the moonbeam, the witch flies by...  
caught by the wizard's eye he creates a magic spell. Attack goes the wind, she goes into a spin  
and nothing less than thorns catches her fall. He grips onto her body. He fills it with her potion.  
And into the moonbeam they launch into the sky. He grips onto her body. He fills it with her potion.  
And into the moonbeam they launch into the sky.
