

# Diamond Eyes

[Rishloo](#)

We are not machines  
we are not machines programmed, encoded  
we are so much more, we are so much more oh the lights  
burning like fireflies caught in a web  
electricity hums in our heads  
we're overwhelmingly fearless when diamond eyes light up the sky, I promise you that we can change the world  
when diamond eyes light up the sky, I promise you that we can change... we are not your routines  
we are not your routines despite what you've told us  
we are all one, we are all one...
