

Shut Up And Explode

Boom Boom Satellites

Downfall, and it all falls down
I fall from grace I got your taste

Turn off your mind, unwind
and see how high the cloudy sky

Run away Run away
Leave your lemon drop

Soak it up Soak it up
Won't you crush on me

Run away Run away
Leave your lemon drop

Soak it up Soak it up
Won't you crush on me

Running free Running free
Driving me insane

Shut it down Shut it down
It's about to explode

Run away, Run away, Run away, Run away...

I think I'm raw so I draw
Just press that button
It's all so good

Now my heart bursts
Like a bottle of wine
You lose, you bite your lip

Let it down Let it down
Keep it in your heart

Bring it up Bring it up
Savor my world

Let it down Let it down
Keep it in your heart

Bring it up Bring it up
Savor my world

Let it out Let it out
I make it burn

Bottle up Bottle up
Count it all joy

Let it down, Let it down, Let it down, Let it down...
