

Obsolete

Astronoid

We believe in love
We foresee the doubt
Casting forward we will find
We were broken, we were blind
Further from the truth, we leave them far behind
We are broken, we are blind
Watch what you say
The monumental impact of it
No one explained
Casting forward we will find
We were broken, we were blind
Further from the truth, we leave you far behind
You are broken, you are blind
No more ideals
No search for truth
No use retract
We are mindless
You are a shell of a human being
A useless product of technology
