

I Already Do

[Chely Wright](#)

Caution's in the wind, the hardest part is through
You don't have to try so hard to make me fall for you
I've surprised myself with what I've gone and done
Just today I heard myself swear you were the one
Laugh I just have to laugh, I really thought you knew
I can't believe that your asking me when I will love you
I already do, I already do
You've been doing fine, please don't change a thing
It's too good to hide away, so I might as well come clean
I didn't shout it out but everybody knew
Funny you're the only one who didn't have a clue
Laugh I just have to laugh, I really thought you knew
I can't believe that your asking me when I will love you
I already do, I already do
I gave you my heart, can't you feel the power?
You want to see the light, baby, the sun's been up for hours
Laugh I just have to laugh, I really thought you knew
I can't believe that your asking me when I will love you
I already do, I already do
