

Breathe

Wafia

Take you down
Take you slowly away
Close your eyes
Let me show you the way to my heart
Feeling empty today
My heart, is feeling empty today
You take my...
You're taking my breath away
You take my...
You're taking my breath away
You take my...
You're taking my breath away
You're taking my breath away
You're taking my breath away
Go back and out
I see your silhouette
You taste like lies, jealousy, and regret
Oh his disguise
How you hurt me within
Somehow I like, when you get under my skin
Let me take you down
Take you slowly away
Close your eyes
Let me show you the way to my heart
Feeling empty today
My heart, is feeling empty today
You take my...
You're taking my breath away
You take my...
You're taking my breath away
You take my...
You're taking my breath away
You're taking my breath away
You're taking my breath away
I'm not perfect
I'm still searching
Somewhere in between, clubs and churches
Somewhere in between, berets and purses
While I have you here in person

Let me take you down
Take you slowly away
Close your eyes
Let me show you the way to my heart
Feeling empty today
My heart, is feeling empty today
You take my...
You're taking my breath away
You take my...
You're taking my breath away
You take my...
You're taking my breath away
You're taking my breath away
You're taking my breath away
