

Insect Collector

SHONEN KNIFE

Going to a mountain alone with her insect cage
Lost track of time while waiting for another insect
Konchu saishu Going home to give an inspection to a little shell
Consulting a picture book to see what she collected Konchu saishu All arranged neatly in a case and kept with
care
Just before bedtime one more look and she's happy
Insect collecting is a hobby few can share
But when she's thinks about her insects
She feels happy, oh so happy, she is happy
