

# While I'm Young

Max Milner

I'm leaving home  
Left to my own devices  
I've packed a bag of clothes  
Doesn't matter what the price is  
I'm a fly alone  
Take a chance cause i can't sacrifice this  
Opportunity to hold  
All the things I've ever wanted since I started And my pockets are full of books and strings  
No, I don't need desirable things  
I'm searching for the similarity  
For release, for belief This time I, I won't say goodbye  
I'll get on the flight and go  
I'll be fine, this time tomorrow  
But I can't help but be reminded  
I wasted my time but there's no surprises now  
I've been waiting for too long I need to drop the past and pick up what's left  
Drop the past and pick up my life while I'm young As the gates closed  
Look to find the time, my place  
Searched to find my row  
Pulled my seatbelt to its tightest  
With no bag below  
My future feels it might be at its brightest  
Though it might be moving slow  
It's picking up some speed as both the tires lift My pockets are full of books and strings  
No, I don't need desirable things  
I'm searching for the similarity  
For release, for belief This time I, I won't say goodbye  
I'll get on the flight and go  
I'll be fine, this time tomorrow  
But I can't help but be reminded  
I wasted my time but there's no surprises now  
I've been waiting for too long  
I need to drop the past and pick up what's left  
Drop the past and pick up my life while I'm young I'll ensure this plane won't ooze  
I'll strip down to coffee and colors again  
I'll ensure that we'll be covered in covers again Drop the past and pick up what's left  
Drop the past and pick up my life while I'm young This time I, I won't say goodbye  
I'll get on the flight and go  
I'll be fine, this time tomorrow

But I can't help but be reminded  
I wasted my time but there's no surprises now  
I've been waiting for too long  
I need to drop the past and pick up what's left  
Drop the past and pick up my life while I'm young
