

# Dark Horse

## Pheromone

The skies are dark, the storm is coming  
You can't see beast you're becoming  
No blood in veins, it's only venom  
I only think it's always better

Than none  
Better than none  
I'm focused to see the soul behind your deep eyes  
Next moment I'll realize that I am paralyzed  
A little moth is flying to the flame - so give it to me, give it to me  
The truth is buried between - we are so empty
