

# Circus Lights

## Black Lab

Come on and spend the night  
Under the circus lights  
Want to see you high above the ground  
You know I've swallowed fire  
I've fallen off the wire  
Too many times before  
And you're asking me

To show you more love  
More life more heat  
You're asking me  
Shaking, burning  
To show you more  
More life more heat  
You ask and  
We can't say what comes  
When these circus lights go out

I'll be the tattooed man  
You can be the acrobat  
I'll try to catch you when you fall  
We'll be together then  
Like a pair of Siamese's twins  
Entwined against the floor  
Tell me what more could you ask for

More more life more heat  
You're asking me  
Shaking burning  
To show you more  
More life more heat  
You ask and  
We can't say what comes  
When these circus lights go out  
When these circus lights go  
When these circus lights go out

Are you innocent no one's innocent  
Still like to hear the big crowd roar  
When I see that light

Everybody dressed in white  
Will you be there by the door  
Will show me what I'm looking for

More life more heat I'm askin' please  
Shaking burning, show more love  
More life more heat  
You ask and we can't say what comes  
When these circus lights go out  
When these circus lights go

I slid away, what's going on  
I slid away, what's going on  
I slid away, what's going on  
I slid away, what's going on
