Starborn

Iron Savior

Bound to the stars, bound to a land
Unspoiled and virgin, this journey has to end
Out in the cold, lonely we feel
Outcast and homeless, in coffins made of steelFar beyond, so far beyond a strange horizon
History, the past is lost but we will live onStill on the quest, forever we're riding
No place to rest, in deep space we're glidingStarborn children, their destiny
Starborn out in the cold, their sanctuary
Faster than light, we cruise the unknown
Into the dark we've been thrown
Starborn and lost in the coldWhere can we go, where will we find
Shelter and silence from all we've left behind
So many times we thought we had it all
But we had to follow the stars and their callMemories of all we've left will fade away
Atlantis will be lost in war and will decayGoddess of fate, forever we're riding
Light up the shade, in deep space we're glidingStarborn children, their destiny
Starborn out in the cold, their sanctuary
Faster than light, we cruise the unknown
Into the dark we've been thrown
Starborn and lost in theGoddess of fate, forever we're riding
Light up the shade, in deep space we're glidingStarborn children, their destiny
Starborn out in the cold, their sanctuary
Faster than light, we cruise the unknown
Into the dark we've been thrown
Starborn and lost in the cold, lost in the cold
