

# If Tomorrow Never Comes

[Jeffrey Osborne](#)

Feeling your breath in your silent sleep  
Rehearsing words I never thought I'd say  
I would give anything to know... Read More  
If all I'm feeling now  
Will disappear or will it stay But if tomorrow never comes  
I had the love we've made tonight  
Now in my heart I knew how good a love can be  
For there's one more with all my life  
I had one night when love was right  
And I hold on to it  
If tomorrow never comes I never dreamed, I'd be the one to change  
Look at me completely swept away  
Now I'm afraid to be without you  
If I should lose this ever  
How could I ever be the same But if tomorrow never comes  
I have the love we've made tonight  
Now in my heart I knew how good a love can be  
For there's one more with all my life  
I had one night when love was right  
And I hold on to it  
If tomorrow never comes You are the one that I've been waiting for  
Kiss me to say forever  
Hold me this way forever
