Don't Worry Baby

Los Lobos

Standin' there by the window, starin' out at the night
You've got so many troubles on your nervous mind
But don't worry baby, it's gonna work out fine
You hear the sound of footsteps, stealing 'cross the floor
You picked up the receiver, you didn't know what for
Then you saw the shadow, steppin' through the doorWell don't worry baby, what the world may bring
Well don't worry baby, it won't change a thing
Life is a fly and then you dieStandin' near by the window, starin' out at the night
You see your lover leanin' against the old street light
But don't worry baby, it's gonna be alright
He was tossin' and turnin' and he couldn't sleep
It ain't sure to bother and it was just a dream
So where was he goin', headin' down the streetWell don't worry baby, what the world may bring
Well don't worry baby, it won't change a thing
Life is a fly and then you die
