

Fools Like Me

[Lisa Loeb](#)

Everybody go, the party's over
I want to be alone in my head
In my bed tonight you never show
You must really love her
You think I don't know but I do
Yeah it's true, I think over is over
I'm right back where I started
(When it comes to wanting you)
I can't have what I wanted
But I did, I can, I was
I am only human, living, dying
Just like any fool who ever breathed
If love is blind, if love's a drug
Always is it, always was and
Love was surely made for fools like me
I know where I'm going
I'm tripping I'm sliding around that's okay
At least I'm excited
It wasn't how I planned it
(Wasn't how I planned it feet are where I landed)
(At least I understand it now)

My feet are where I landed
(Feet are staying on the ground)
But I did, I can, I was
I am only human, living, dying
Just like any fool who ever breathed
If love is blind, if love's a drug
Always is it, always was and
Love was surely made for fools like me
Fools like me
(Fools like me)
I did, I can, I was
I am only human, living, dying
Just like any fool who ever breathed
Maybe it's the sanest thing
Or just the sweetest kind of dream
But love was surely made for fools
(Love was surely made for fools)

Love was surely made for fools
(Love was surely made for fools)
Love was surely made for fools like me
