

# Night Screamer

## Stratovarius

Scream at nights  
But you won't be heard  
It's deep inside  
The pain within your head You cry for help  
The torture won't let you go  
Your mind is aching  
And you can't go on Reaching for window  
Your execution  
Is the only solution Night screamer  
Night screamer Afraid at nights  
There's nothing to be afraid of  
Your nightmares  
Won't leave you alone Try and think hard  
What's wrong in your life  
Try and stay cool  
You'll find peace of mind Reaching for window  
Your execution  
Is the only solution Night screamer  
Night screamer  
Night screamer  
Night screamer Night screamer  
Night screamer  
Night screamer  
Night screamer
