

You & A Promise (Demo)

Howie Day

She was nervous, she was late
She left it up to fate
Standing at a phone And she knows what she wants
And she came here to take it
How perfect it could be, you and me And she met him at the door
I don't want anymore
Remember what you said You and a promise
You and a promise
You He turned and didn't wait
He walked right through the gate
So glad to be alone And he knows who to call
I'll always be there for you
Call me anytime I don't mean to offend
A voice on the other end
Is a stranger to me You and a promise
You and a promise
You And they say to themselves
And they say to themselves
How can I ever let this happen You and a promise
You and a promise
Take me back or let this happen
