

# Lords and Masters

## GWAR

As master of this mud ball, I feed the fire high  
With corpses of my victims, the beacon leaps alight  
A vision of the cosmos of a planet wracked in pain  
Far off sensors detect chaos, billions more are slain  
We have thrown a party, the guests are set aflame  
Create a blinding bleacon, one that shall proclaim  
GWAR lives, GWAR rules, we scream towards the stars  
We have counted all of them and claim them now as ours  
Lords and masters, lords and masters  
Lords and masters  
Lords and masters of all we survey  
The master sent us here as penance for our crimes  
I do believe we kicked his ass, I do believe it's time  
Can't you see me from the void? Can't you feel my hate?  
As my brothers rape and kill the cripples I create  
Lords and masters, lords and masters  
Lords and masters  
Lords and masters of all we survey  
Many have mocked us, many have died  
Don't need to succeed, so we don't try  
Destined to godhood to many's dismay  
Just lords and masters of all we survey  
We reject our sentence, it's far too cruel a fate  
I'll lure you in and take your ship and fly off with me mates  
GWAR lives! GWAR rules, we scream towards the stars  
Return to the glory of Alpha Centauri, we're sick of playing bars  
Their innards bloat outwards just like swollen  
slugs  
We inject their women and rape all their drugs  
Embracing this hatred and all it entails  
A bulging and bloated harvest of entrails  
Many have mocked us, many have died  
Don't need to succeed, so we don't try  
Destined to godhood to many's dismay  
Just lords and masters of all we survey  
Lords and masters, lords and masters  
Lords and masters  
Lords and masters of all we survey  
It couldn't be more clear, it's not fucking Braille  
A bloated and bleeding and bloody harvest of entrails  
Squirming from my dick-slit, they look like shell-less snails  
Compared to my crimes, Hitler's pale  
Compared to my crimes, compared to my crimes, Hitler's pale
