

Mentobe

Taproot

Fly so high like a star, I'm straight up
Representin' the spirit in the world
That keeps on forgettin' the meaning of life All things are dancin' in the rhythm
Of eternal harmony, astrology, the portrait of wisdom
Across the skies is full of truth, no lies Like a star I'll shine every night without you
By my side feels so right, all alone in a world
So cold, no, I'm not alone in a world so cold
