

# Someone Before Me

[Loretta Lynn](#)

Someone before me still turns you inside out  
When we're together, she's all you talk about  
You're always wanting me to do the things she used to do  
Someone before me sure left her mark on you I've tried to get inside your heart but I don't have a chance  
Now I can see she's on your mind, with every little glance  
You're living on old memories my love can't get through to you  
Someone before me sure left her mark on you I've tried to get inside your heart but I don't have a chance  
Now I can see she's on your mind, with every little glance  
You're living on old memories, my love can't get through to you  
Someone before me sure left her mark on you
