

Flies, Ants and Elephants

Di-rect

Find a piece of happiness, on a rainy day
These higher are ablaze
Could we ever stop the bid on earth
Built it up inside nowhere left to hide
Memories of a better time, buried in my mind
Hard to leave behind
Still hearted by the emergent
Lie into my face
Feel another place I need a sample for a state of mind
I'm not investment for a better time
I'm not gonna start until hit the line
Start thinking read between the line
Live every day like it's your last Honestly I don't believe
That we will ever see
What we meant to see
So, forget the negativities
I'm living in the world
Like a refugee I need a sample for a state of mind
I'm not investment for a better time
I'm not gonna start until have the line
Start thinking read between the line
Live every day like it's your last Honestly I don't believe
That we will ever see
What we meant to see
So, forget the negativity
I'm living in the world
Like a refugee Our cause is stronger
Our love will heal
