

Child Of The Wild Blue Yonder

[John Hiatt](#)

She has the wind as a witness
She has feelings that fly by night
She believes in forgiveness
But it's not love if it holds too tight And you can fly beside her
But you gotta go where your heart says go
She lets the bright lights guide her
Through the rain and the drivin' snow
And where they come from she don't know She's a child of the wild blue yonder
Flying out of here
She's a child of the wild blue yonder
Born in an angel's team If you see her falling
That's just a little trick she does
She makes a dive for the pain that's calling
Then heads for the clouds like a little dove But she can't help her laughing
She can't stop your crying days
Sometimes it hurts to be having
To hold on to a love that surely must fly away She's a child of the wild blue yonder
Flying out of here
She's a child of the wild blue yonder
Born in an angel's team Medicine woman raised her
Spirit father praised her
Through their love she was set free
From a baby kicking and screaming
To a full blooded woman dreaming
With the power just to be She's a child of the wild blue yonder
Flying out of here
She's a child of the wild blue yonder
Born in an angel's team She's a child of the wild blue yonder
Flying out of here
She's a child of the wild blue yonder
Born in an angel's team She's a child of the wild blue yonder
She's a child of the wild blue yonder
She's a child of the wild blue yonder
She's a child of the wild blue yonder
