

# Brilliant

## Deepspace 5

So far so good  
Stumble through life so complicated it's nearly Impossible  
And i lost my way like i knew i would and keep it Together somehow anyway  
And i remember you and me  
Climbing over backyard fences diving naked in the Swimming pool  
All those faces friends those memories fade so fast  
Like every love song on the radio Is it brilliant where you are  
Where the lights are low  
Is it brilliant where you are  
Where the lights are Through a million days through a million hazy nights  
We sit amusing in our politics  
Through wine and talk through sex and art we fill our time  
And numb ourselves with what's to come  
But i'm older now got a little girl of my own  
And her fears are my fears now  
I know that it's the end of days for moderates  
But thinking people are thinking still Is it brilliant where you are  
Where the lights are low  
Is it brilliant where you are  
Where the lights are So far so good  
Stumble through life so complicated it's nearly Impossible  
And we lost our way like i knew we would  
And keep it together somehow anyway  
Woke up from an impossible dream  
And we talked and we spoke and we drank and we sang  
And we danced and we live and we love and we give  
Without question or faith then we fight till we hate  
And we hope and we pray that this violence will fade  
It's always the same it's the same life
