

The Whiffenpoof Song (Baa Baa Baa)

The Crew Cuts

There are ten millimeters in a centimeters
a hundred centimeters in a meter
a thousand meter in a kilometer
There are 12 inches in a foot 3 feet in a yard
1760 yards in a mile
There are thousand grams in a kilo
60 else is in a pound
14 pounds in a stone
So now you know 1 inch is equal to .54 centimeters
There are 1.6 kilometers in a mile
For every hundred grams you get 3 and half pounces
1 kilo is 2 pounds and 3 ounces
and just a little bit so if yours 6 feet tall thats 1 meter 83
If your 5 feet tall thats 1 meter 52
If you weight 200 pounds thats almost 91 kilos
14 stones 4 pounds with no ounces
Measurements
Measurements
We could'nt live without them
Measurements
Measurements
We used them everyday There are a thousand milliliters in a liter
A hundred centiliters in a liter
With pines a little bit confusing
There are 8 pines in a gallon
No matter way you live
but a US pines is not the same as a british pine
a US pine is 473 and
a british pine is 568
There are 16 fluounces in a US pine
20 fluounces in a british pine
so a US gallon is 3.8 liters
and a british gallon is 4.5 liters
Measurements
Measurements
We could'nt live without them
Measurements
Measurements
We used them everday Measurements
