

# Absent

## Rosetta

Well now, it seems like more than silence has been broken  
And I think I've figured out the dying lie  
Yes, the truth is that your dialect is half truth  
Another conversation died alone  
This is something we've created  
Yes, well the sufferments abated  
It doesn't have to be a prophecy  
We could be both seeking destiny  
It's fuckin' down to us and them  
You can decide which one wins  
Now's the time, are you  
The hunter or the fuckin' hunted?  
Absent, sometimes it feels like it's us against them  
Absent, sometimes it feels like their angers are justified  
If it feels like I'm absent from your conversation  
Just keep on talkin' and you'll sure find out you're probably right  
Now, it seems that there are no easy answers  
To the same old question I've imposed  
What does it mean? Why would you bother askin' me?  
Like it's something I should know  
Just 'cuz they paid me to take it  
I guess their money gave me credence  
Watch our records soar as you slow down  
  
To buy the accident, so sick  
Absent, sometimes it feels like it's us against them  
Absent, sometimes it feels like their angers are justified  
If it feels like I'm absent from your conversation  
Just keep on talkin' and you'll sure find out you're probably right  
Know that I'll pull your covers, bitch  
Yes, I'm fixin' to knock that ego down  
Well, I might slap your punk ass to the floor  
Stupid motherfucker, nothin' but a buster  
Still talkin' shit, devoid of soul, so you dig yourself a hole  
Take the fun out, I load the gun for you  
Incorrect cause and effect you've been sold  
Live in the wrong, so ya live in the lies  
Take the fun, load the gun, incorrect  
Cause and effect I'm absent

Absent, sometimes it feels like it's us against them  
Absent, sometimes it feels like their angers are justified  
If it feels like I'm absent from your conversation  
Just keep on talkin' and you'll sure find out you're probably right  
I don't care, yes you're probably right, I don't care
