Liver Let Die

Tony Sly

I knew the car was waiting
I was running down the street
trying to catch the last cab to a bar that I would meet
All my friends' acquaintences
It doesn't matter tonight
it's all about the songs and not the fights

So everybody sing along
This could be tonight's one more song
This shot we take before the bell
We raise our glass to songs
That we know so well

I give to you this message
In a town so far away
I wish that you are here is all but said it's so cliche

Life is celebrated
And tonight is all for her
She sticks out just like a C minor

[chorus x3 (second time can be muted or singing only)]

So everybody sing along
This could be tonight's one more song
This shot we take before the bell
We raise our glass to songs

That we know so well

[ending]

That we know so well
That we know so well
That we know so well
That we know so well
That we know so well
