

# Saving The World

Brooke Fraser

Didn't I tell you everything's fine?  
If there's a good and bad we're somewhere in between  
Often I feel like we're all navigating blind  
Could we get a change of pace to set the scene  
We could stay another day in this confusion  
Let it permeate us 'till we can't move on [Chorus]  
And while we're waiting we could try saving the world  
Or are we storing that up for a rainy day?  
I'm anticipating the time when it'll be my turn  
It could be fun to try  
I think that I'll save the world as a fun afternoon activity  
Seventy thousand things to ponder today  
The most significant are bottom of the list  
Forty five million recipes and ways  
To exaggerate and compound the stress  
We could stay another day in this apathy  
Let it permeate us 'till we're numb through [Chorus] Ooh.....  
And while we're waiting we could try saving  
the world  
Or are we storing that up for a rainy day?  
I'm anticipating the time when it'll be my turn  
It could be fun to try  
I think that I'll save...  
And while we're waiting we could try saving the world  
Or are we storing that up for a rainy day?  
I'm anticipating the time when it'll be my turn  
It could be fun to try  
I think that I'll save the world.
