

Minority of One

Dag Nasty

Look back on what they told you
and see what truth can't hide
the government controls you and brother that's not just a line
but don't trust them to tell you what is right
no one can tell you how to live your fucking life
question priorities
don't trust the majority
question priorities
don't trust the majority
even when you're a minority of one
now some will try to dictate and tell you what to say
they say that they control you but don't give yourself away
but don't trust them to tell you what to say
burn free and bright and walk your path today
question priorities
don't trust the majority
question priorities
don't trust the majority
even when you're a minority of one
Look back on what they told you
and see what truth can't hide
the world want to control you and brother that's not just a line
but don't trust them to tell you what is right
no one can tell you how to live your fucking life
question priorities
don't trust the majority
question priorities
don't trust the majority
even when you're a minority
when you're a minority of one
