After the Party Ends

Catman Cohen

Got my crazies by my side
Drunk on vodka cyanide
Setting fire to the night
Thats the way we live the lifeBefore we go our separate ways
Were gonna roar, were gonna rage
Never forget we were friends
Long after the party party party party endsWere gonna stay friends
Long after the party party party party endsAnd Ill be seeing you there
Fists pumping in the air
Gonna jump, were gonna swing
Gonna dance, were gonna singBefore we go our separate ways
Were gonna roar, were gonna rage
Never forget we were friends
Long after the party party party party ends
Were gonna stay friends
Long after the party party party party endsTheres a place where time stands still
Far from things that make me cry
And I would take you there tonight
So we could stay young all our livesYouve been my friend when I was down
Ill miss you when youre not around
And I will think of you
In all the good Ive found
In every light, in every soundAnd Ill be seeing you there
Fists pumping in the air
Gonna jump, were gonna swing
Gonna dance, were gonna singBefore we go our separate ways
Were gonna roar, were gonna rage
Never forget we were friends
Long after the party party party party ends
Were gonna stay friends
Long after the party party party party endsGot my crazies by my side
Drunk on vodka cyanide
Setting fire to the night
Thats the way we live the lifeBefore we go our separate ways
Were gonna roar, were gonna rage
Never forget we were friends
Long after the party party party party ends
Were gonna stay friends
Long after the party party party party ends
