

# Nights (feat. W. Darling)

## Snow Tha Product

Right here face to face in your sheets  
We're tucked underneath all these city street lights  
Where everything starts with your kiss  
Didn't I do it all for the nights like this  
So I...What's a little liquor to a cold heart?  
What's a little pill but a little number feeling now  
It can never end if it don't start  
You can never do it all, if you are never willing uh  
Hold up I think my phone vibratin'  
Slow up I think the whole world hatin'  
Came up and now the whole view changin'  
I've been up on game, I've just been waiting  
What's a little change to a pocket full?  
What's a little party when the work already done  
You got that drink up in your system and it's audible  
Words are getting slurred and now your vision kinda trippin'  
If it's vibes you want then it's vibes you get  
What you want, baby I'll do that  
Glad you chose to be my new friend  
What you tryna be and what's next?  
Right here face to face in your sheets  
We're tucked underneath all these city street lights  
Where everything starts with your kiss  
Didn't I do it all for the nights like this Then let it end on a night like this  
On a night like this  
On a night like this  
On a night like...What's a little liquor when you're feeling uncomfortable  
What's a little high when you've been feeling so fuckin' low  
Cause I've done told you  
If it's vibes you want then it's vibes you get  
I've been on you since I walked in  
I can tell that you wanna come with me, what's poppin' then?  
Don't gotta tell me 'bout your past, tell me 'bout your future  
Got me feelin' sleepy, I've been fuckin' with them two cups  
You done did it, I've been with it  
Henny in your glass and you're babysitting, kill it  
It ain't really nothin' but I'm on, yeah  
You know latin girls and that Patron  
And oh my god I'm talkin

Wonder if you've got someone at home, yeah  
I know how it go when I'm on tour and got me watchin'  
If it's vibes you want then it's vibes, yeah  
We can go and hit the valet park, yeah  
All I'm tryna do is get home and get comfortable  
When the light is so bright  
You get a little bit  
Little bit blinded  
When you're lifted so high  
You falling feels like flying  
When you're lost in those eyes  
Feels like you might be gone forever  
So, one last kiss Then let it end on a night like this  
On a night like this  
On a night like this  
(On a night like)  
On a night like this  
On a night like this  
On a night like this  
(On a night like)  
Now let it end on a night like this  
On a night like this  
On a night like this Baby I could change your life, that's if you let me, yeah  
I could let you spend the night, that's off the record  
What you say, what you say, what you say?  
What's your name, what's your name, what's your name?  
Baby I could change your life, that's if you let me, yeah  
I could let you spend the night, that's off the record  
What you say, what you say, what you say?  
What's your name, what's your name, what's your name? It ain't really nothin' but I'm on, yeah  
You know latin girls and that Patron  
And oh my god I'm talkin  
Wonder if you've got someone at home, yeah  
I know how it go when I'm on tour and got me watchin'
