

# You've Got A Way

## DJ Encore

You can get me right here, where I wanna be  
Feeling it all over, deep inside of me  
Everytime I think I'm close, you take me closer  
Even now when you're away, I feel you're near  
You've got a way of making sunshine out' the rain  
You've got a way of turning ashes into flames  
I can't believe you're making darkness into light  
You're making all my contradictions turn out right  
You're in my horizon, everywhere I see  
And when I try to reach you, you're right next to me  
Everytime I think I'm close, you take me closer  
Even now when you're away, I feel you near  
You've got a way of making sunshine out' the rain  
You've got a way of turning ashes into flames  
I can't believe you're making darkness into light  
Like you make all the famous cliches sound so right  
Everytime I think I'm close, you take me closer  
Even now when you're away, I feel you're near  
You've got a way of making sunshine out' the rain  
You've got a way of turning ashes into flames  
I can't believe you're making darkness into light  
You're making all my contradictions turn out right  
You've got a way of making sunshine out' the rain  
You've got a way of turning ashes into flames  
I can't believe you're making darkness into light  
Like you make all the famous cliches sound so right
