Agent 5

S.P.O.C.K

He volunteered half a year ago
and left the mother-ship straight awayThe covert action was a big success
We got reports punctually every dayBut for a week, there has been nothing at all
We don't know what's going on
Agent 5
Is he alive?
We haven't heard
a single wordAgent 5
Is he alive?
Been lost for days
without a trace
He is equipped with a beacon device
intended for situations like thisWe can still see the blips on our screen
telling us exactly where he isBut what if he has been executed
and someone has stolen his gear!
Agent 5
Is he alive?
We haven't heard
a single wordAgent 5
Is he alive?
Been lost for days
without a trace
