

Right Now

Sabrina Carpenter

We'll never be as young as we are right now
We'll never see the world like we do right now
So take in what's around you, put your camera down
Take a shot, give it all you got I have a way of getting stuck on yesterday
I tell him it's the little things that come our way
Always looking forward, always looking back
They seem so near, but then I hear 'Cause time moves on so quickly, without or with me
I've got to take a breath And slow down, slow down
My mind is racing
Catch up, catch up
I've got to pace myself, I'm always wondering,
But I don't need to go right now Let go, let go
We hold our fears too tight
Begin, begin
To live your life, the present is our future past
We've got to make this moment last right now Have you ever noticed how your heartbeat feels, when your
Love is so exciting 'cause it's getting real
Have yourself listen to obtain your soul
But that's your intuition and it always knows Time moves on so quickly, without or with me
I've got to take a breath Slow down, slow down
My mind is racing
Catch up, catch up
I've got to pace myself, I'm always wondering,
But I don't need to go right now Let go, let go
We hold our fears too tight
Begin, begin
To live your life, the present is our future past
We've got to make this moment last right now Right now, right now Enjoy the ride, ready to run right now Right
now Let go, let go
We hold our fears too tight
Begin, begin
To live your life, the present is our future past
We've got to make this moment last, right now
