

Heart of the Great Alone

Stornoway

Lead us out of the ice,
Protect and defend us from your heart.
Your heart of the great alone
It cracks beneath our feet as we go.
We go south, shasing the light in our captain's eyes
Blinded by the snow
You lead us down, into the silence,
We stare in the face of it.
Save us from the crevasse
Guide us throughout the frozen heart.
The heart of the great alone,
It spins beneath our feet as we go.
We go miles, looking for signs of
Unravelling minds, drifting through the snow
You watch us slide, into the silence
Walk like you're innocent.
Lead us bravely to sleep
Carry us on in your heart
Your heart of the great alone
Commit us to the ice and we'll go...
We'll go home, returning as heroes
And leave us to lie, glorious in the snow
Watch us rise, into the silence
We flew in the face of it.
