

Ode To Chin

Switchfoot

Get siked man, get siked man
What's your direction
Tell me what's wrong
Tell me what's right
What's your direction
Think about somebody else
For the night
Life's more than girls
God's more than words
You're more than this
So what's your direction
And where are you now
Grow, grow where you are
Anchor your roots underneath
Doubt your doubts
And believe your beliefs
What's your direction
What matters most is what

You do now
What's your direction
All that you've been
Makes who you are now
'Cause I've been ashamed
I've been a fool
You know I've backed down
When I lose direction
I pray to be found
Grow, grow where you are
Anchor your roots underneath
Doubt your doubts
And believe your beliefs
Grow, grow where you are
Anchor your roots underneath
Doubt your doubts
And believe your beliefs
