

Under These Lights (DjIw Remix)

[Xenia Ghali](#)

A sea of souls and dancing daughters
Different stories different blood
All together dreaming
Wish everyone could see it
Waves of life colliding love Under these lights
Embracing all life
We are lost within these beautiful sights
In these walls
The world is so bright
Let's spread the warmth we found
Under these lights Under these lights
Under these lights
Let's spread the warmth we found A field of hearts here in a moment
Beneath the sun beneath the moon
All together beating
Wish everyone could feel it
Breathing beauty living proof
