The Trouble With Never

Van Halen

You often wonder
You wanna know
How deep does
The rabbit hole go?
I know
You never thought about it but
Ask yourself later
When you turn on your stereo
Does it return the favor?
I gotta know!
That's the trouble with never
Sure seems like a mighty long time
That's the trouble with never
When was the last time
You did something for the first time?
Hello!
Every Einstein's assigned a Tweedle-Dumb
And a Tweedle-Dumber
Ain't no fool to see
Never even wonder
Yeah, we could come together
I will call for you
Hey, never's good for me
How's never sound to you?
1-800-TELL-ME-BABY
That's the trouble with never
Sure seems like a mighty long time
That's the trouble with never
When was the last time
You did something for the first time?

Yeah!
Level with me babe
Talk to me
This could damage your reputation
My wicked, wicked ways
But maybe I just will, since you put it that way
Delusions of elegance
You never can say

You wanna play, a game
You can't quit when you get played
Mistakes make people
Isn't that what people say?
Let's unplan the moment
Dance the night away
Selective amnesia is only a heartbeat away
A simple question
Concern a time
Suppose you wait forever
And then you change your mind?
That's the trouble with never
Sure seems like a mighty long time
That's the trouble with never
When was the last time
You did something for the first time?
When was it?
When was it?
Oh! Text me baby.
When baby? Tell me!
When was the last time?
Tell me.
