Hot & Cold

Basement Jaxx

Don't nobody speak to me no more
I wanna hear but can't hear you when you call
Do you really mean it or have I just seemed to miss the point
Whatever it is it's bringing me to boiling point
Hot and cold, wet and warm, hot and cold
Let's just make one thing we can all have
When it all crumbles down
Now I hear you talking some nonsense
And I know it's peripheral and completely missable but
Nicer than silence and the odd siren
That would otherwise be all I hear
Hot and cold, wet and warm, hot and cold
I want to hear you, hear you when you call
Hot and cold, wet and warm, hot and cold
Let's just make one thing we can all have
When it all crumbles down

It makes no sense at all to me
It makes no sense at all to me
Reach out try and slither under my skin
Slide under me take my veins
And go straight to the black hole within
Now I hear you talking some nonsense
And I know it's peripheral and completely missable but
Nicer than silence and the odd siren
That would otherwise be all I hear
Hot and cold, wet and warm, hot and cold
I want to hear you, hear you when you call
Hot and cold, wet and warm, hot and cold
Let's just make one thing we can all have
When it all crumbles down
