

Step Off

Kacey Musgraves

You sure look real pretty in your glass house
You probably think you're too good to take the trash out
Well are you dumb are you blind
Cause it's a real fine line
Between telling a joke and turning the knife
Don't wreck my reputation
Let me wreck my own Step off, step off
Yeah you're getting too close to me
With all your negativity
Just get lost
Just trying to make a little difference here
So why you gotta interfere
Just keep climbing that mountain of dirty tricks
When you finally get to the top
Step off
Yeah You screwed everybody over in this town
There ain't nothing between you and the cold hard ground
Keep running your mouth and stretching the truth
You just might find a hole in your parachute
'Cause whatever gets you high
Will always bring you down So step off, step off
Yeah you're getting too close to me
With all your negativity
Just get lost
Just trying to make a little difference here
So why you gotta interfere
Just keep climbing that mountain of dirty tricks
When you finally get to the top
mmm
Step off Sticks and stones may build a throne but
You'll be up there all alone So step off
Yeah yeah step off
Keep climbing that mountain of dirty tricks
When you finally get to the top
Step off, step off, step off
