Your Friends Are Gone

Circa Survive

(All your friends are gone)
It climbs in slowly behind
If you trust your neighbors
They'd never suspect what you're like
Welcome them into your life
No one has to know
Playback, delete, and rewind
It's getting closer than you thought it'd get
Just get inside
It's moving faster than you'd ever planned
You'll be relieved when
When you open up
You let yourself seem vulnerable
And the morning sun
Will make our bodies comfortable
In taking off your clothes
Everything hidden is suddenly exposed
Nobody wants to hear another
Story about how you couldn't write right
It climbs in slowly behind
No one has to know
Playback, delete, and rewind
Each one is louder than the one before

And the people you care for
At ten times the expense
of all that you spent
You'll be relieved when
When you open up
You let yourself seem vulnerable
And the morning sun
Will make our bodies comfortable
In taking off your clothes
Everything hidden is suddenly exposed
You'll keep it on the inside
'Cause that's the safest place
'Cause that's the safest place to hide
All of your friends are gone
And you were barely holding on

We were wrong and they fooled us once again
We are the loneliest of men, we're the loneliest
And all your friends are gone
Nobody hears you
And all your friends were wrong
Nobody cares
And all your friends are gone
Nobody is here with you
And all your friends were wrong
Nobody cares
