

# Strung Out

## LeCrae

How could I love you when all you ever did was wrong?

How could I trust you? You lied to me all along

You strung me outI'm going through withdrawals, the shakes and all

You did me dirty, I almost died, dawg

I let you play me and plus you gave me

All the filthy things I wanted, all my sinful cravingsBut I see you, yeah you're see-through

Somebody opened up my eyes and I don't need you

I gotta leave you before you take my life

I used to date you then I went ahead and made you wifeyYeah, you had me feenin' for the stuff you offer

You such a scoffer, I know you want me in my coffin

But girl you already lost it, your ways are perished

Thank you God for Your salvation, this is what I cherishHow could I love you when all you ever did was wrong?

How could I trust you? You lied to me all along

You strung me outYou strung me out

You strung me out, you strung me out

You strung me out, you strung me out

You strung me out, you strung me outUh, I'm out your grip, I'm out your grasp

You had me mesmerized, you had me in your hands

Lust of the eyes, the pride of life

You offered me the world, you made it look so niceYou took me high, but left me down and out

I run right back to you thinkin' that you would help me out

You never satisfy, you only gratify

You're just a bad illusion to every passerbyAnd I don't want you 'round, you only bring me down

So glad I quit you I don't miss you 'cause you had me down

So get gone, get goneSo get gone, get gone

So get gone, get gone, so get gone, get gone

So get gone, get gone, so get gone, get gone

So get gone, get goneHow could I love you when all you ever did was wrong?

How could I trust you? You lied to me all along

You strung me outYou strung me out

You strung me out, you strung me out

You strung me out, you strung me out

You strung me out, you strung me outDo not love the world or the things in the world

If anybody loves the world, the love of God is not in 'em

The world's passing away along with its desires butWhoever does the will of God will live forever

I know it hurts sometimes

We've got to go through withdrawal

'Cause we've been strung outHow could I love you when all you ever did was wrong?

How could I trust you? You lied to me all along

You strung me out You strung me out  
You strung me out, you strung me out  
You strung me out, you strung me out  
You strung me out, you strung me out
