Science/Visions

CHVRCHES

Breathe
Don't speak
It's leaving your body now
Slow heart
Set free
A circuit of consciousness
When you are truly yourself
You will
Succumb to a permanence
A light by day
A shadow resides by nightI (I) hear (hear) your (your) breathingI (I) feel (feel) you (you) leavingWith understanding
You won't let it cast you down
A mind full of questions
A current to purify
Science and vision
Be near when I call your name
Or ask me a questionI (I) hear (hear) your (your) breathingBreathe
Don't speak
It's leaving your body nowI (I) feel (feel) you (you) leavingHeart set free
A circuit of consciousnessI (I) hear (hear) your (your) breathingLight by day
A shadow resides by nightI (I) feel (feel) you (you) leavingWith understanding
You won't let it cast you down
A mind full of questions
A current to purify
Science and visions
Be near when I call your name
A mind full of questions
A current to purify
Science then visions
Be near when I call your name
Or ask me a question
