

# Science/Visions

## CHVRCHES

Breathe  
Don't speak  
It's leaving your body now  
Slow heart  
Set free  
A circuit of consciousness  
When you are truly yourself  
You will  
Succumb to a permanence  
A light by day  
A shadow resides by night I (I) hear (hear) your (your) breathing I (I) feel (feel) you (you) leaving With  
understanding  
You won't let it cast you down  
A mind full of questions  
A current to purify  
Science and vision  
Be near when I call your name  
Or ask me a question I (I) hear (hear) your (your) breathing Breathe  
Don't speak  
It's leaving your body now I (I) feel (feel) you (you) leaving Heart set free  
A circuit of consciousness I (I) hear (hear) your (your) breathing Light by day  
A shadow resides by night I (I) feel (feel) you (you) leaving With understanding  
You won't let it cast you down  
A mind full of questions  
A current to purify  
Science and visions  
Be near when I call your name  
A mind full of questions  
A current to purify  
Science then visions  
Be near when I call your name  
Or ask me a question
