

Another Day Without You

[Haddaway](#)

There are moments in our lives
When everything goes right
And we're making love
Endless love And then we have all these days
Where we go separate ways
A heart full of pain
And no one's to blame It's just another day
Without you, without you
It's just another day
Without you, without you Many times we throw away
What we regret the next day
And we say goodbye
Forever goodbye
