See Me Through

Edison Glass

The words are not there
When you cannot grasp
Your heart is scared
Where can you go?Turbulence, see out the storm
Through matters of every kind
Sails are torn, the anchor's gone
Your words we will findYou will see me through
You will see me throughNot unambiguous
Components of deceit
The inner workings
Motivation's repleteNeither know nor need to know
Subterfuge of thoughts so low
Lead us to depend on you
For you will see me throughYou will see me through
You will see me through
You will see me through
You will see me throughGlorious, my glorious
I feel you breaking down on me
Glorious, my glorious
I feel you breaking down on me
I feel you breaking down on meYou will see me through
(Even then though my heart is scared)
You will see me through
(Even then though my heart is scared)
